

Drug Companies Won't Tell You ... And Your Doctor Doesn't
Know

The Deadly Truth

About Your Prescription Medicines

Dear Friend,

I have shocking news for you: by the time you go to bed tonight, 400 normal, healthy people will do exactly what their doctors tell them to do... and then die. And that's not all...

THOUSANDS more will not die, but they will suffer with dangerous or debilitating symptoms -- often worse than any disease -- just because they followed their doctor's orders. And that's still not all...

MILLIONS more people -- maybe even you -- will spend every single day suffering needlessly with headaches, fatigue, stomach problems, anxiety, insomnia, depression, sexual dysfunction and all kinds of other discomfort. All with the full knowledge and helpless acceptance of their doctor. All because they think they're being helped.

You see, the culprits in all these tragedies -- that happen over and over again every single day -- are common prescription drugs. Drugs that are supposed to make us well, are making us sick ... and even killing us! And here's the scary part:

**No one -- not even your doctor -- is immune.
The next victim could easily be YOU or someone you love!**

Fortunately, you can protect yourself and your loved ones. You can get the TRUTH about drugs and their side effects. You can discover safe, natural healing alternatives. It's all available now in the most complete, easy-to-use book on medicines ever published called, *Drugs, Side Effects and Natural Alternatives*. I want to rush a copy of this life-saving book to your home for you to use for 3 months **FREE** of any risk.

The Time-Bomb In Your Medicine Cabinet

The truth is that while prescriptions often provide relief, they are still powerful chemicals that in many cases do more harm than good. And for about 146,000 people every year, they mean death. Of course, the drug companies know about this, but with BILLIONS of dollars in profits on the line, they don't want to tell you.

You only need to look as far as your own medicine cabinet to find

potential problems like these ... from nuisance to death:

- Common **aspirin** is a miracle in many ways, but if you take even a little bit with the popular clot-buster on page 57 you can bleed to death
- You often need both an antibiotic and an allergy medication to combat **sinusitis**. But if you mistakenly are prescribed the two most common of these drugs ... they could kill you instantly
Page 48
- Hold onto your hat if you take this common **bronchitis** medication on page 92. It makes your hair fall out
- The widely prescribed drug for **prostate** infections causes many men to develop a bad taste in their mouth that won't go away
Page 19
- **Heartburn** medicine on page 63 can make you crazy! You'll make faces, smack your lips, puff your cheeks, even tap your foot uncontrollably.
- There's a 50/50 chance that this common drug to control **seizures** will cause you to experience dangerous side-effects Page 88
- You may be able to get **skin cancer** or **psoriasis** under control with this common prescription on page 71 ... but if you take aspirin at the same time, you could be dead instead.
- **Back pain ... chills ... dizziness ...** think you've got the flu? Could be -- unless you take this common drug to control **Parkinson's Disease** Page 54

Your Doctor Can't Help You ...

But Drugs, Side Effects and Natural Alternatives Can!

If you're counting on your doctor to have the information to save you, you'd better think again. In a recent test on the side effects of common prescription medicines, **70% of the doctors FAILED!**

And that's on the COMMON drugs. Imagine how little most doctors really know about the medicines they only prescribe a couple times per year! Maybe something you are taking right now!

- Benazepril is a powerful new drug that can prevent **heart-attacks** by lowering high blood pressure. But if you aren't careful, it can strike you down with a heart attack on-the-spot Page 51

The drug companies go out of their way to tout the healing abilities of their new drugs. And they work just as hard to keep the problems

hidden. In *Drugs, Side Effects and Natural Alternatives*, you'll get the whole story about every drug and condition so you can keep your family safe.

Life-Saving Truths About Prescription Drugs, Side-Effects and Alternatives

If you've been blessed with good health, and only the common ailments like high blood pressure, thank God. But don't think you're immune from the dangers of drugs.

You see, It's not just drugs for the rare and unusual illnesses that can cause serious problems. Some of the most routinely prescribed medicines on the market today are the ones with some of the most debilitating side effects. *Drugs, Side Effects and Natural Alternatives* alerts you and protects you from things like ...

- You risk nerve damage and numbness in your hands and feet with this common treatment for athlete's foot Page 16
- This over-the-counter pain killer causes everything from bleeding stomach ulcers to severe headaches Page 27
- If you suffer from colitis, ulcers or lupus, it may be due to this common antibiotic on page 47
- You may feel queasy without this motion sickness patch on page 119, but be prepared to experience blurred vision because of it
- One of the most commonly prescribed cough medicines on page 28 can kill you if you take it a certain way. And the scary thing is how easy this can be done.
- Heartburn medication that rakes in billions of dollars for pharmaceutical companies every year also shuts down some people with vivid and frightening hallucinations Page 92
- Before you see marriage counselor, you should know about these 20 common prescriptions that can shut your sex life down Page 69
